

V:PRO

Protect yourself with **technical textiles** - safe from biological vectors!

V:PRO is effective against vectors such as mosquitoes and ticks.

Textiles treated with this active ingredient show a significantly **higher knock-down rate** compared to non-treated materials.

It significantly reduces the risk of **contracting diseases** such as malaria, yellow fever or Lyme disease.

- Textile properties are **not affected**
- Passes all **relevant tests** (WHO cone and tube test and TL 8305-0331)
- Active protection **against biological vectors** of all kinds
